Many people have a shopping list that they use repeatedly. Our app helps users stay organized and watch their spending by tracking purchase history. The app can send out reminders on what to buy and the user can adjust how much they want to spend in a specific time period. First Name	Last Name	Email

Problem Statement:

Who is experiencing the problem: People with limited budgeting experience and people who tend to be forgetful.

What is the problem: Overspending and not staying organized, someone running out of the items that they need

Where does the problem present itself: Shopping and entertainment, transportation, grocery, household items

Why does it matter: Helps people balance their budget and stay organized.

Ex. If someone purchases a 6 pack of paper towel rolls at the beginning of every month, this app would track that and remind them at the start of each month so they don't forget to buy a new pack.
